

Instructions Key Chains With Name

The handicraft material you need for making a key chain with name:

- 1 keyring
- 1 m cord (PP-polyester cord)
- motif bead(s)
- colourful wooden beads
- 2 safety beads
- letter cubes for the desired (room) name

The small tools you need:

- scissors
- lighter
- tweezers

Let's Get Crafty!

Step 1: Experimenting With Beads

Now that your craft materials are in front of you, you can get creative. Arrange the beads for your key chain's bead strand(s).

The easiest way to do this is starting with the **letter cubes** and adding the wooden beads afterwards. At each bead strand's end we recommend using a **safety bead**, as the respective knot can disappear in it.

Tip: Long words can simply be divided in two and represented by two bead strands of pearls (for example as "CHILDREN'S" and "ROOM").

Step 2: Attaching the Keyring

If you like your **key chain design**, it's time to attach the keyring: For the **first bead strand**, double a piece of PP-polyester cord. Pass the resulting loop through the keyring from behind and then pull it back over the keyring from the front. Doing this creates a **knot**.

Step 3: Preparing the Stringing

For the beads' easier stringing, we recommend using a little trick: Put the two cord ends together so that one of them protrudes about 2 centimetres. Now **melt** both ends slightly with a lighter. Use your fingers or tweezers to press the lower cord end slightly against the protruding one. This way you can string the wooden beads onto the double cord more easily thanks to the protruding end.

Step 4: Stringing the Wooden Beads

Now let's **string** the first strand's beads: It is recommended not to string the security bead yet. Because there's a little trick to making it fit tighter. To do this, pull the two cord ends apart again and make a **simple knot** on the wooden bead that is in front of the safety bead.

Step 5: Finishing the Bead Strand

With some force, pull the safety bead with its smaller opening first over the simple knot. Make a very tight **double knot** behind it.

Carefully cut off both cord ends. Weld the knot with the lighter and press it together with your fingers. Press the welded double knot into the safety bead's hole by using **tweezers**.

Step 6: Making the Second Bead Strand

If you have planned a **second bead strand**, simply repeat steps 2 to 5.

You're done! Enjoy your **self-made, individual key chain's beautiful sight** every day. Hopefully it will help you to always have the right key at hand in your daily hustle and bustle.
